We are the Security Layer of the blockchain & the web!

BitLab Coin is our Utility Token.

White Paper | Pitch Deck

One company. Multiple Tech Sectors. One UTILITY token.

SCAN • ASSURE • LOCK • VERIFY • RELAY • SECURE

BitGuard White Paper / Pitch Deck

THE COMPANY

BitGuard

One company. Multiple Tech Sectors. One UTILITY token.

BitLab Web3 Security & Cybersecurity Infrastructure

Token Locker . Liquidity Locker . Advanced Smart Contract Audit. Token Security scanner . Cybersecurity . Blockchain Dev & Security . Web3 Application Security & Development. API Service.

CoinRelay

AI-Powered Crypto Market Intelligence • Markets Data • DEX/CEX Terminal Data • Coin Discovery • AI Q&A • Coin Security • Wallet Intel • Market Analytics • Etc.

BITGUARD

One company. Multiple crypto-native capabilities. One utility token.

Brand architecture with the market-intelligence platform and BitLab positioned as distinct products:

BITGUARD
Parent company

WEB3 SECURITY & INFRASTRUCTURE

BITLAB
Audit • Scanner • Locker • API
Web3 security, blockchain infrastructure & services

CRYPTO MARKET INTELLIGENCE

COINRELAY TERMINAL
Markets • DEX/CEX • Terminal • Discovery
AI • Security • Wallet Intel • Analytics

BITLAB COIN (BITLAB)
Native utility token across the BitGuard ecosystem

SERVICE DISCOUNTS | PLATFORM UTILITY | PREMIUM DATA | FUTURE ECOSYSTEM USE

BITGUARD SECURITY SPECTRUM • ECOSYSTEM ARCHITECTURE

BITLAB COIN • BITLAB

Price without proof is just a number.

Six tabs is not a research process. CoinRelay puts the market on one screen. BitLab is the layer that can scan it, audit it, and lock it. BitLab Coin is the utility token between them.

See it

Live boards for top coins, movers, new pools, and every major network.

Check it

A security screen beside the price. A screen is not an audit. The audit is a separate product.

Place it

CEX, DEX, perpetual, and futures venues on the token itself.

Ask it

Ask BitGuard AI against live data, current news, and other sources. Not a canned tape.

Prove it

Locks, audits, and public pages a third party can open.

Use it

BitLab Coin pays for qualifying services and opens published ecosystem utility.

Value moves faster than trust.

$1.31B+

Web3 losses in H1 2026 across 344 incidents.

25,706

Published audit findings tracked by Oak Security through Q2 2026.

$8.62B

Aggregate exploit losses in the Oak Security review set.

What people still stitch together

An audit can review code. It does not, by itself, prove a liquidity lock, a mint authority, a wallet cluster, or a live market.

Price sites show the candle. They do not show the locker.

Security sites show the finding. They do not show every CEX and DEX printing the coin.

That split is the product gap.

What BitGuard puts in one place

BitLab for the Web3 security infrastructure.
CoinRelay for the market intelligence.
BitLab Coin for utility inside that company.

Scan. Assure. Lock. Verify. See the market. Secure the operation.

The blockchain stays the authority. The products make the evidence readable.

Sources: CertiK Hack3D H1 2026; Oak Security Q2 2026.

Security is already a buying requirement.

$6.4B	$7.6B	$31.3B	22.4%
2025	2026	2033	2026–2033 CAGR

Who already has to care

Token issuers

Scan, audit, lock, then be findable on CoinRelay.

DeFi and DAOs

Contract risk plus a market people can actually read.

Launchpads

A project needs proof before it needs a ticker.

Wallets and data desks

Embedded security data and a terminal, not another bookmark.

Path: Web3 projects → ecosystem platforms → digital-asset companies → broader security work.

CoinRelay is the daily surface. BitLab is the reason a listing can be more than a logo. Market-size figures are third-party estimates, not BitGuard revenue.

Source: Grand View Research, Blockchain Security Market, 2026.

One lifecycle. Then the market screen.

01

SCAN

Free token-risk signals. Mint, freeze, honeypot indicators, holders, liquidity.

02

AUDIT

Manual plus automated review. PASS, FAIL, WARN. Reports can carry a SHA-256 seal.

03

LOCK

Token, vesting, and liquidity locks. Non-custodial. The chain holds the state.

04

VERIFY

Public pages, QR, and a REST API. Evidence someone else can embed.

05

RELAY

CoinRelay. Live markets, venues, discovery, charts, wallet intel, and Ask BitGuard AI.

06

SECURE

Cybersecurity, blockchain development, and Web3 application security.

Free scanner → paid assurance → onchain lock → public proof → CoinRelay → ongoing security.

BitLab Coin is the utility token for qualifying use across that system. It is not equity in the company.

Web3 security infrastructure, already shipping.

Token Locker

Lock the token. Public record of owner, amount, and unlock.

Liquidity Locker

Lock the pool. No BitLab withdrawal key for customer assets.

Advanced Smart Contract Audit

Logic, permissions, token mechanics, reentrancy, oracles, admin, economic risk.

Token Security Scanner

Free, AI-assisted read of public onchain risk signals. Not a substitute for an audit.

Cybersecurity

The operating security around the product, not only the contract.

Blockchain Dev & Security

Build and review on the chains the products already touch.

Web3 Application Security & Development

Apps, APIs, and the workflow around the token.

API Service

REST and JSON so a wallet, launchpad, or desk can embed the proof.

Mainnet locker today: Solana · BNB Chain · Polygon · Cronos. Additional EVM networks in testing.

The market screen that sits next to the security layer.

AI-Powered Crypto Market Intelligence · Markets Data · DEX/CEX Terminal Data · Coin Discovery · AI Q&A · Coin Security · Wallet Intel · Market Analytics

Boards	Top, Trending, Gainers, Losers, New, Hot, Most visited, and Watchlist. Search covers coins, tokens, and exchanges. Bitcoin stays #1 by market cap.
Networks	Bitcoin, Ethereum, BNB Chain, Solana, Base, Arbitrum, Polygon, Avalanche, Optimism, Cronos, Sui, Aptos, Tron, Hyperliquid, Cardano, Near, and Robinhood.
Token page	Contracts on each network, website, socials, supply, FDV, dominance, ATH, ATL.
Candles	A real candlestick chart for 1D, 7D, 1M, and 1Y. Scaled to that coin's own high and low.
Every venue	CEX, DEX, perpetual, and futures. One row per venue, its top pair, and the full pair count.
Discovery	New pools, plus a New Listings page after BitGuard approves a request.
Ask BitGuard AI	Live market data, current news, and other sources. Not a script that only dumps the tape.
Security and wallets	A screen score and wallet intel on the same asset. The score is a model. The audit is BitLab.

Attention can be bought. Rank cannot.

$99

Enhanced token information

Logo, banner, links, explorers, and the fields a project wants public. Flat fee. Same idea as an enhanced profile, at BitGuard's price.

Boost

Attention, not a new rank

A boost can lift Trending after the operator confirms it. It does not move market-cap rank. Bitcoin remains number 1.

$0 or $250

Request a listing

A standard request is free. Fast pass is $250 to jump the review queue. Paying does not guarantee a listing. Approval does. Then it shows on New Listings.

Featured

BitLab Coin, above the board

BitLab Coin is pinned for exposure. It is not inserted as the number-one asset. The ranking underneath stays a market-cap ranking.

Account

Watch, vote, comment

Favorites, bullish or bearish votes, and comments require a BitSpectrum account. Reading the market does not.

Charts

Candles, not a color bar

Each token chart is a candlestick series scaled to that coin's own high and low, with open, high, low, and close.

Verification infrastructure. Not a custodial box.

NON-CUSTODIAL
No withdrawal key is held by BitLab for customer locks.

TWO-STEP OWNERSHIP
Ownership transfer is initiate, then accept.

IMMUTABLE V1
Live V1 lock cores are immutable. A change ships as a new version.

FORWARD-ONLY
Unlock time can move forward. It cannot move backward.

NO EMERGENCY EXIT
No admin emergency-withdraw path for customer assets.

PUBLIC + API
Owner, amount, unlock, history, QR, and REST/JSON.

The chain is the record. The website is a window. If the two ever disagree, the chain wins.

Open the locker, the mint, and the burn transaction from the link page at the back of this deck.

Point tools are everywhere. The system is not.

Category	The usual desk	BitGuard
Token risk	A scanner or an API	Scanner, then an audit, then a public proof.
Locks	A vesting or LP locker	The lock sits next to the risk work and the API.
Audits	A PDF from a specialist	The report can be sealed and tied back to the asset.
Market boards	Price, rank, and a chart	CoinRelay adds venues, discovery, wallet intel, and a path into BitLab.
Operations	A separate security firm	Cyber, blockchain, and Web3 application security in the same company.

Named categories are references, not a claim that any one product is identical.

Free to enter. Paid when the work is real or in rush mode.

Free

Scanner

A risk signal with no paywall. It is how a project starts.

Paid

Audit

Professional review when a scan is not enough.

Infra

Locker

Token and liquidity locks, with public verification.

$99

Token profile

Enhanced CoinRelay information. Flat fee.

Boost

Attention

Confirmed boosts move Trending. They do not move rank.

$250

Fast pass

Faster listing review. Not an approval.

A project can enter free, buy an audit, lock liquidity, publish the proof, and be read on CoinRelay. API usage and broader security work sit behind that.

BitLab Coin can be used for qualifying services, including a published 10% discount where that offer is live. Utility can change as products ship. It is not a claim of profit.

Utility first. Supply you can read yourself.

TOTAL SUPPLY

50,000,000,000

50 billion burned from the original 100 billion. Current total is 50 billion.

API call to the total supply:
https://bbspectrum.com/?bitlab_totalcoins=1

CIRCULATING SUPPLY

37,298,674,524

API call to the circulating supply:
https://bbspectrum.com/?bitlab_circulating=1

Public APIs, read 8 October 2026. If they move, the APIs win.

Service discounts

Pay for qualifying BitLab services in BitLab Coin, including the published 10% discount where offered.

Platform utility

Use inside BitLab and CoinRelay where a feature is actually released.

Premium data

A path to richer terminal and security data as those gates open.

Later ecosystem use

Further utility only when it is shipped. Not a blank check, and not equity.

Original supply was 100 billion. 50 billion were permanently burned. Current total supply is 50 billion. Burn transaction is on the link page.

The 50 billion, split so the live supply still matches.

Presale is retired as a bucket. CoinRelay is live, so that 15% is now CoinRelay operations and distribution. Amounts below add to 50,000,000,000. The five circulating buckets add to 37,298,674,524.

IN CIRCULATION

Market liquidity	10,000,000,000	20.000%
Community and ecosystem use	8,000,000,000	16.000%
CoinRelay operations and distribution	7,500,000,000	15.000%
Partnerships and market development	6,298,674,524	12.597%
Product development, released	5,500,000,000	11.000%

NOT IN CIRCULATION

Team and founders, time-locked	7,500,000,000	15.000%
Treasury reserve	3,201,325,476	6.403%
Service rewards, not yet released	2,000,000,000	4.000%

How to read this

Team and founders: 7.5 billion, 15%. None of that bucket is treated as circulating here. Schedule: nothing at the start, a 12-month cliff, then 36 equal monthly releases, fully vested at month 48.

The circulating figure is the API, not a guess. If the API moves after 8 October 2026, the API wins and this page should be refreshed.

Nothing in this split is a promise of price, liquidity, or return. BitLab Coin is a utility token.

Six names. Security, audit, and Web3 engineering.

This is not a concept deck.

- Token Security Scanner is live, without a paywall.
- Advanced Smart Contract Audit is live, with a published method and report integrity controls.
- The locker is live on Solana, BNB Chain, Polygon, and Cronos.
- The security API is documented.
- CoinRelay Terminal is live.
- Total and circulating supply are public APIs, not a slide-only number.
- 50 billion of the original supply is burned. The transaction is public.
- BitLab Coin’s audit PDF is published.

The products are up. Distribution is the job.

Now	CoinRelay is public. Scanner, audit, locker, and supply APIs are public. Listing review is a human decision.
Next	More venues, more chains on the locker, and desks that embed the API instead of sending people away.
Then	Deeper wallet intel, tighter security automation, and utility that ships only when the product can support it.
Always	A boost is not a rank. A fee is not a listing. A screen is not an audit. The chain remains the record.

We are the Security Layer of the blockchain & the web. **BitLab Coin is our Utility Token.**

BitGuard · BitLab · CoinRelay Terminal · https://coinrelayterminal.bbspectrum.com/

The legal restrictions follows. Read them. This deck is not an offer of securities and not a promise of profit.

18. LEGAL/DISCLAIMER/RESTRICTION

1. Token Information

Issuing Entity: BitLab Blockchain Security Spectrum

Token Name: BitLab Coin

Token Symbol: BITLAB

Blockchain: Solana

2. Primary Purpose

BitLab Coin is a digital utility token intended for use within the BitLab ecosystem and in connection with designated products, services, and ecosystem activities made available by the issuer. The specific utility and functionality of BitLab Coin may evolve as the ecosystem develops.

BitLab Coin is intended to provide utility within the ecosystem and is not presented by the issuer as an investment product or as a means of obtaining a financial return.

3. Regulatory Status

The issuer does not represent BitLab Coin as an investment, ownership interest, equity interest, debt instrument, or guarantee of financial return.

The issuer has not represented BitLab Coin as registered as a security with any governmental or regulatory authority. The legal and regulatory characterization of digital assets varies by jurisdiction and may depend on the manner in which a token is issued, marketed, distributed, sold, and used.

Nothing concerning BitLab Coin should be interpreted as a legal determination that BitLab Coin is a security, commodity, virtual asset, or other regulated financial instrument in any particular jurisdiction.

4. UNITED STATES RESTRICTION

BitLab Coin is not offered or sold to persons located in the United States or to U.S. persons where such offering, sale, distribution, or use would be prohibited or restricted under applicable U.S. federal or state law.

The issuer restricts or prohibits access to BitLab Coin by U.S. persons, residents of particular U.S. states or territories, or other persons where required by applicable law, regulation, or legal or compliance considerations.

Persons located in the United States should not acquire, purchase, or use BitLab Coin unless they have independently determined that the transaction is lawful under the laws applicable to them.

5. U.S. State & Jurisdiction Restrictions

BitLab Coin is not intended to be offered, sold, distributed, or otherwise made available to persons in U.S. states, territories, or jurisdictions where the acquisition, sale, distribution, or use of digital assets would be prohibited, restricted, or subject to registration, licensing, qualification, or other regulatory requirements that have not been satisfied.

The issuer may impose additional restrictions on specific U.S. states, territories, jurisdictions, categories of persons, or locations where necessary to comply with applicable law or regulatory requirements.

Because digital-asset laws and regulations may differ among U.S. jurisdictions and may change over time, the availability of BitLab Coin should not be interpreted as an indication that BitLab Coin may legally be acquired or used in every U.S. jurisdiction.

6. General Geographic Restrictions

BitLab Coin is not intended to be offered, sold, distributed, or otherwise made available to persons or in jurisdictions where doing so would violate applicable law or regulation.

The issuer may restrict participation from particular countries, states, territories, jurisdictions, categories of persons, or locations where required by applicable law or regulatory considerations.

Users are responsible for determining whether acquiring, holding, transferring, selling, or using BitLab Coin is lawful in their jurisdiction.

7. Investment Disclaimer

BitLab Coin is not offered as an investment and does not represent ownership in BitLab Blockchain Security Spectrum or any affiliated entity.

Nothing concerning BitLab Coin constitutes a solicitation to purchase an investment, an offer of securities, or a promise or guarantee of financial return.

No representation is made that purchasers of BitLab Coin will receive any financial return, profit, appreciation, dividend, distribution, or other economic benefit.

8. Risk Disclosure

Digital assets involve substantial risk. The value of any crypto coin/token, including BitLab Coin, may decline substantially as quickly as it can increase.

BitLab Coin is not a bank deposit and is not insured or guaranteed by the FDIC, SIPC, or any other governmental insurance program.

Digital-asset markets may experience substantial volatility, limited liquidity, rapid price movements, market manipulation, technological failures, cybersecurity incidents, regulatory changes, and other risks.

Purchasers should carefully evaluate the risks associated with acquiring and holding digital assets before participating in any transaction involving BitLab Coin.

9. No Guarantee of Value or Liquidity

The issuer makes no guarantee regarding the future price, market value, trading volume, exchange availability, or appreciation of BitLab Coin. Past performance or historical price information is not indicative of future results.

10. Blockchain & Technology Risks

BitLab Coin operates on the Solana blockchain and is subject to risks associated with blockchain technology.

These risks may include, without limitation:

- Network congestion or interruption;
- Blockchain outages or failures;
- Transaction failures or delays;
- Program or smart-contract vulnerabilities;
- Software defects;
- Cybersecurity incidents;
- Wallet failures;
- Loss or compromise of private keys;
- Unauthorized access to digital assets;
- Third-party infrastructure failures; and
- Other technological or operational risks.

Blockchain transactions may be irreversible.

Users are solely responsible for maintaining the security of their wallets, private keys, seed phrases, authentication credentials, and other information necessary to access their digital assets.

11. Market & Liquidity Risks

Digital-asset markets may experience extreme volatility and limited liquidity.

The price of any digital asset, including BitLab Coin, may change rapidly and may be affected by market conditions, trading activity, liquidity, market sentiment, technological developments, regulatory developments, and other factors.

12. Third-Party Platforms

BitLab Coin may be displayed, traded, or referenced through independent third-party platforms, including Raydium, GeckoTerminal, CoinMarketCap, digital wallets, central exchanges, decentralized applications, and other services.

These platforms are independent of the issuer and are not controlled by BitLab Blockchain Security Spectrum.

Their availability, functionality, data, listings, trading interfaces, terms, policies, fees, security, and regulatory status may change without notice.

The issuer does not guarantee the availability, accuracy, security, functionality, or continued support of BITLAB COIN on any such third-party platforms.

13. Official Token Verification

Users should independently verify the official BitLab Coin Solana mint address before purchasing, transferring, or otherwise interacting with BitLab Coin.

Users should exercise caution regarding unofficial tokens, counterfeit tokens, impersonation websites, fraudulent contracts, phishing attempts, and other unauthorized representations of BitLab Coin.

14. Tax Disclaimer

The acquisition, holding, transfer, sale, or use of digital assets may have tax consequences.

Users are solely responsible for determining and satisfying their applicable federal, state, local, and foreign tax obligations.

BitLab Blockchain Security Spectrum does not provide tax advice.

Users should consult an appropriately qualified tax professional regarding their individual circumstances.

15. No Professional Advice

Information concerning BitLab Coin and BitLab Blockchain Security Spectrum ecosystem is provided for general informational purposes only.

Nothing on our website, whitepaper, social-media accounts, promotional materials, or other communications concerning BitLab Coin constitutes legal, financial, investment, accounting, or tax advice.

Users should obtain independent professional advice before acquiring, holding, transferring, selling, or using BitLab Coin.

16. User Compliance Responsibility

Each user is responsible for determining whether the acquisition, holding, transfer, sale, or use of BitLab Coin is permitted under the laws and regulations applicable to that user.

The issuer does not assume responsibility for a user's failure to comply with applicable laws, regulations, sanctions, tax requirements, or other legal obligations.

17. Issuer's Right to Restrict Access

The issuer reserves the right to refuse, restrict, suspend, or prohibit purchase of BitLab Coin by any person, geographic location, jurisdiction, platform, or category of user where the issuer

reasonably determines that such action is necessary or appropriate for legal, regulatory, compliance, security, or risk-management purposes.

The issuer may implement geographic restrictions, eligibility requirements, or other access controls where appropriate.

18. Changes in Laws & Regulations

Digital-asset laws and regulatory requirements may change over time.

Changes in legislation, regulation, regulatory interpretation, enforcement actions, court decisions, or governmental policy may affect the availability, functionality, transferability, taxation, or legal treatment of BitLab Coin.

The issuer makes no representation that the regulatory treatment of BitLab Coin will remain unchanged.

19. Important Notice

BitLab Coin IS A DIGITAL ASSET. AS EVERY OTHER SUCH ASSETS, IT INVOLVES SUBSTANTIAL RISK. PURCHASERS SHOULD CONTINUOUSLY MONITOR THE VALUE OF THEIR PURCHASE AS THE VALUE MAY INCREASE OR DECREASE.

Nothing contained in this document constitutes an offer or solicitation to purchase securities or other regulated financial instruments.

BitLab Coin should not be acquired by any person who is prohibited from doing so under applicable law.

Persons located in the United States and persons in other restricted jurisdictions should independently determine whether they are legally permitted to acquire or use BitLab Coin before engaging in any transaction.
